

8th December 2008, Cambridge, UK

AI-2008 is the latest conference in the leading series of UK-based international conferences on Artificial Intelligence. After a successful event in 2007, SGAI is again offering the **Forum for AI Research Students** to support student members of the AI community. This is a full day of workshops and presentations offered **FREE TO STUDENTS**, and includes:

- Guidance on conducting research and writing the thesis
- Feedback on research and research plans
- Advice on undergoing a viva
- The chance to meet other research students and develop networks
- An opportunity to discuss their work with senior researchers and practitioners

AI Research Student Forum sessions include:

- Getting a PhD - Doing Good Research workshop
- Student presentations with feedback from senior academics
- Discussion groups
- Panel session with recent PhD graduates, AI academics, industrial representative and PhD recruiters
- How to Survive your Viva!

SHARE your experiences with others students. Gain valuable feedback by giving a presentation on your project, or through discussions with others applying or developing AI techniques.

MEET experienced AI researchers and experienced practitioners from academia and industry. Students are encouraged to discuss their work with AI-2008 delegates and make new contacts.

ENJOY the historic surroundings of Cambridge and of Peterhouse, its oldest college, founded in 1284.

Students attending **FAIRS'08** will be very welcome to attend the **AI-2008** conference and workshops on 9th-11th December, for which a special student rate is available.

Full details are at www.bcs-sgai.org/ai2008.
